# 125 CB

TAGLIERINA DA BANCO

A BATTERIA

## Blade

125mm octagonal blade has a cutting capacity of 42mm. The push-button sharpener allows you to revive the cutting edge of the blade in less than ten seconds, without dismantling it.

## Double Battery

The double battery supplied is rechargeable via base and has a level indicator. It works with lithium ion technology and is capable of developing 5 Ah.

## High Thicknesses

This scissors uses a modern electric battery motor and thanks to the bronze/steel gears it develops a high cutting torque and is particularly suitable for cutting large thicknesses up to 42mm, such as mattresses, sponges and natural fibers made up of numerous layers.

## Specs

Model	125 CB
Blade diameter	125 mm
Blade speed	800 rpm
Thickness	42 mm
Battery	5 Ah
Weight	2000g
