HOT AIR SEAM SEALING MACHINE WITH LONG ARM

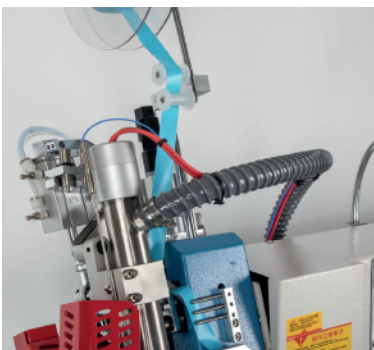

Description

Computerized long arm hot seam sealing welding machine. Suitable for applying thermoadhesive tape on bulky materials such as camping tents, sails, truck tarpaulins, etc.

Independent rollers

The machine's rollers are independent so they can rotate at different speeds and curl thanks to the differential. They also have the cutting-insertion function with automatic micro recovery of the ribbon and the possibility of setting the length for automatic cutting.

Up to 700°

The heating structure is sealed and the temperature which can reach 700° can be controlled by the multifunction touch screen.
